

## Why Partner with ERP Maestro?

Increase profitability, reach new customers, and expand your market with a cloud-based, access control tool that can be deployed in minutes

Provide more value to customers by reducing risks effectively, economically and quickly

Join a community of innovative technology leaders working together to conquer complex security challenges

## ERP Maestro Momentum Partner Program

At ERP Maestro, we are committed to helping companies using SAP detect and prevent segregation of duties (SOD) vulnerabilities, insider breaches and fraud with automated access controls and continuous visibility into risks. Our partner ecosystem is an extension of this vision and includes audit firms, technology companies, consultants, resellers and security evangelists, who are equally dedicated to reducing risk and security challenges on a global scale.

## What's in It for You?

The distinct benefits of ERP Maestro products — time savings, reduced costs, in-depth reporting and customization — both complement and enhance your offerings. By using our tools, partners are empowered to tackle previously unattainable engagements with the expanded ability to:

- Perform IT security & audit assessments
- Provide customized SOD and sensitive access rule books
- Remediate and redesign security roles
- Provide compliant SAP security role development
- Enable continuous security monitoring

## Partners

## End-to-end Platform for Access Controls

Our partners leverage the ability to provide their customers with an end-to-end solution for automated access controls and continuous access risk monitoring. These solutions include:

- **Access Analyzer:** Provides real-time visibility into segregation of duties access conflicts based on users, roles and transaction usage
- **Access Reviewer:** Allows for the seamless, automated management of periodic access recertification of users' access
- **Emergency Access Management:** Allows security and risk owners to grant temporary elevated access to users in a compliant manner, without exposing the company to unnecessary risks
- **Automated Provisioning:** Enforces preventive controls by enabling secure and compliant provisioning of roles in SAP

## What the Partner Program Provides

- Complimentary use of Access Analyzer for registered partners
- Product and sales training
- Private demonstration environment
- Designated technical support representative
- Access to extensive content and quick-start video library
- Joint go-to-market workshops and marketing support
- Access to early product release updates

“We found that ERP Maestro as a leading SAP partner tool for application security risk detection, monitoring and mitigation, has been a significant accelerator supporting our consulting and managed services team. It allows our clients to not only get clean from a security standpoint but also stay clean.”
